🎉 Development Begins on the Contribute Project Learning App! 📱

Our project team has kicked off the development of the Contribute Project Learning App! This user-friendly app will provide interactive learning modules, practical guides, and inspiring case studies to empower community engagement and social action. The app will provide young people with learning materials of the CONTRIBUTE Project and will enable an easier sustainable education and urban development awareness for youth.

We're excited to bring you this digital tool to make a positive impact—stay tuned for updates!

Project Milestone Update!?

We're thrilled to announce the successful completion of Work Package 2 (WP2), which laid the groundwork for community engagement and training materials. As we move into Work Package 3 (WP3), our focus will be on preparing for local piloting trainings and local conferences in each partner country. These events will offer hands-on learning and foster community discussions on sustainable practices. Additionally, development is underway on the project's mobile application, which will make our resources accessible on the go. Exciting times ahead as we bring our project's vision to life!

What is ahead in Contribute Project?

Contribute Project will continue with WP3 activities, with mobile application, pilot trainings, case studies development, national conferences and the final conference of Contribute Project in Spain. If you are interested in sustainable urban development, come join us in our piloting trainings and help us design a sustainable future for Europe!
